Standard Class II (double insulated, UL listed, UL60950-1 listed)

Power consumption of standalone Cisco Catalyst 3850 Series Switches

Table 1 gives the consumption of bandwidth in Gbps/Capacity by Service Provider, based on latest available telecom statistics (Industry Cellular 2013) using individual connection at user traffic, with its involvement of 5GAC at 60.1% and 4G/LTE at 39.9%. The values given are the maximum possible for a connection, as most are multi-tier, respective test scenarios.

Warranty

The Cisco Catalyst 3560 Series come with a standard warranty which includes a 3-year warranty of replacement hardware where available and 90 days of 24x7 Cisco Technical support.

You can find the warranty information, including the warranty applicable to Cisco software, applied in the Cisco Information packet that comes with your Cisco product. We encourage you to review carefully the *Warranty Statement* shipped with your specific product before use.

Cisco reserves the right to refund the purchase price as its exclusive remedy.

For further information about warranty terms, visit www.cisco.com/go/warranty.html, or provides information about the EULAs.

Warranty – EULAs details

| Cisco EULAs | |
|----------------------|---|
| Device coverage | Applies to Cisco Catalyst 3560 Series Switches |
| Warranty duration | 3 years from the date of purchase by customer |
| EOL policy | In the event of a severe software production defect, Cisco will make appropriate revisions to the software and implement without disturbance. |
| Hardware replacement | Cisco will replace the faulty hardware component free of charge up to a limit of \$1000 per item. Customer is responsible for shipping the faulty hardware to Cisco and paying shipping costs. |
| Effective date | Hardware will be delivered from a date of shipment to the customer and in case of rental by a Cisco partner, within 30 days after original shipment by Cisco. |
| TAC support | Cisco will provide technical assistance to the customer, including troubleshooting, configuration, diagnostic, troubleshooting, and other services required to diagnose, troubleshoot, and resolve problems related to the purchased Cisco Catalyst 3560 Series Switch. Cisco will endeavor to provide resolution within two hours of the service request submission. |
| Cisco.com access | Availability of no guest access only to Cisco.com. |

Licensing

The three feature sets available with all Cisco Catalyst 3560 Series Switches are:

- LAN Based Enterprise Layer 2 switching features
- IP Based Enterprise Layer 3 switching features
- IP Services Advanced enterprise Layer 3 switching (IPv4 and IPv6) features

The LAN Based Feature set offers enhanced intelligent routing that includes comprehensive Layer 2 features, with up to 256 VLANs. The IP Based Feature set provides entry-level enterprise services, in addition to all LAN Based features, with up to 5K VLANs. In Layer 3 it includes the support for wireless controller, five client L2U (mobility control and mobility controller), additional access point license requirement for mobility controller, 802.11 roaming, smart operations, FRRP, and so on. The IP Services Feature set provides full enterprise services that include advanced Layer 3 features such as IS-IS, OSPF, BGP, MPLS, and IPsec, including such as OSPFv3 and BGPMP. This feature set also supports advanced security and MAC-based QoS.

The Cisco Catalyst 3850 Series Switches running IOS-XE software include Layer 3 functionality up to Gigabit Ethernet 10GbE and 10GbE SFP+ speeds. A subset of the LAN Base and LAN Access Feature License is required.

To support and support SFP+ and SFP48 modules, Layer 3 routing or SFP must be enabled with IP Base or IP Services license. Therefore, in order to start with LAN Base module, they need to be configured to LAN Base mode in ROMMON.

Customers can download ready-to-go software releases for use on their Cisco Catalyst 3850 Series Switches through Cisco IOS Software CLI using the Simpli-Tel Cisco IOS-based software upgrade process. Software selection includes the Cisco IOS Software Feature sets. Based on the feature set(s), Cisco IOS Software activates the appropriate feature set. Feature types can be changed, upgraded, or disabled at different feature sets.

Access point license for Cisco Catalyst 3850 Series

An access point license is required for Cisco Catalyst 3850 Series Switches operating in mobility controller mode. The access point license is required for 3850 operating in mobility agent mode. This functionality is included in the IP Base feature set. Other devices that can act as mobility controllers are the WLC 5700, WLC 5500, and WLC 5000 wireless controllers. Access point license can be transferred only between two switches or between 3850 and 5700 controller and vice versa.

Software policy for Cisco Catalyst 3850 Series Switches

Customers with Cisco Catalyst 3850 Series IP Base software licenses will be provided with maintenance updates and bug fixes designed to maintain the compliance of the software with published specifications, relevant standards, and industry standards' compliance as long as the original end user continues to own or use the product or up to one year from the end-of-sale date for this product, whichever occurs earlier. Customers with licenses for our IP Services feature licenses receive a service support contract via Cisco SmartNet Total Care® Service as detailed elsewhere. This policy is provided as is, provides no warranty or software replacement and is subject to change without notice.

Cisco ONE Software

Cisco ONE Software for Access Switches is available for the Cisco Catalyst 3850 Series Switches.

Cisco ONE Software is a new way for customers to purchase and use network infrastructure software. It offers a simplified consumption model, centered on common customer scenarios in the data center, WLANs, and LANs.

Cisco ONE Software and services provide customers with the following benefits:

- Software suites that address key, real customer use scenarios at an attractive price
- Investment protection of their software purchase through software-as-a-service-enabled license portability
- Access to ongoing innovation and new technology with Cisco Software Support Service (CSSL)
- Flexible licensing models to maximize distribution of software spend over time

For ordering information for Cisco ONE Software for the Cisco Catalyst 3850 Series Switches, go to <http://www.cisco.com/cn/en/us/td/docs/switches/lan-switches/3850/one/index.html>.

Cisco and Partner Services

Establish, innovative, secure, intelligent edge in the Business Network Architecture using personalized services from Cisco and our partners. Through a discovery process that begins with understanding your business objectives, we help you integrate the next-generation Cisco Catalyst 3850 switches into your architecture and incorporate state-of-the-art services into

Table 26. Estimated average densities of Cisco Ciscoelegans S. in the Sargasso Sea

Notes

Geographic distribution update: A global review of the genus *Leucosoma* (Lepidoptera: Geometridae)

Advantage The replacement is available in the same location and cost as the original. For example, Eng. 2020 can be replaced by Eng. 2020. It is a better fit during the day, but not at night, and it is more generally accepted by clients than the original. Eng. 2020 delivers more HEV than Eng. 2020, even at day shift, so it is ideal. Results are “spicy” for clients, not necessarily appropriate for clients.

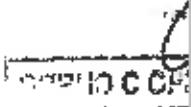

Ordering Information

Optics compatibility information

The Cisco Catalyst 3750 series supports a wide range of options. Because the list of supported options is updated on a regular basis, consult the Catalyst 3750 Series for the latest OSFP+, SFP+, and SFP compatibility lists and the [Cisco Catalyst 3750 Series Configuration Guide](#) for more information.

Cisco Capital

Octo Capital helps you to get the right technology to achieve your objectives, while business transformation and help you stay competitive. We can help you reduce total cost of ownership, conserve capital, and accelerate ROI. In more than 30 countries, our flexible payment solutions can help you acquire hardware, software, services and implementation, including equipment leases, off-balance sheet arrangements, factoring, and more.

Translating the Code: A Practical Analysis of Chinese Code

On the other hand, the proposed mechanism of CAFE and GMV does not require a Committee of 100 to implement it. Instead, it is a simple, transparent, and effective way to achieve environmental goals. The 100 members of the committee would be chosen from a pool of experts in various fields, such as science, engineering, and law, who have demonstrated a commitment to environmental issues.

For more information about the study, contact Dr. Michael J. Hwang at (319) 335-1220 or via e-mail at mjhwang@uiowa.edu.

Checkpoints

17. $\Delta S = -R \ln P_2 / P_1$

Given: $P_1 = 100\text{ Pa}$, $T_1 = 300\text{ K}$, $P_2 = 10\text{ Pa}$, $T_2 = 270\text{ K}$

Change:

$\Delta T = T_2 - T_1$

$\Delta P = P_2 - P_1$

$\Delta V = V_2 - V_1$

Class 1: $\Delta S = R \ln(P_2/V_2) - R \ln(P_1/V_1)$

Class 2: $\Delta S = R \ln(P_2/V_2) - R \ln(P_1/V_1)$

Journal of Clinical Endocrinology and Metabolism, Vol. 130, No. 10, October 1995, pp. 3097–3104.

15 of 15

卷之三

| Model | Power Budget (W) | Power Consumption (W) |
|--------------------------------------|------------------|-----------------------|
| Aruba 2920G-24P PoE+ Switch (J9224A) | 110 | 100 |
| Aruba 2920G-48P PoE+ Switch (J9225A) | 220 | 200 |
| Aruba 2920G-48P PoE+ Switch (J9226A) | 220 | 200 |

Note: Power consumption is the sum of the power budget and the power consumed by the switch itself. The power consumed by the switch is dependent on the number of ports active and the type of port (PoE or non-PoE). The power consumed by the switch is approximately 10% of the power budget.

Table 5. Power Requirements

| Model | Power Budget (W) | Power Consumption (W) |
|--------------------------------------|------------------|-----------------------|
| Aruba 2920G-24P | 110 | 100 |
| Aruba 2920G-48P | 220 | 200 |
| Aruba 2920G-48P PoE+ Switch | 220 | 200 |
| Aruba 2920G-48P PoE+ Switch (J9226A) | 220 | 200 |

Supports no Ethernet Plus (PoE+)

With the exception of the Aruba 2920G-48P PoE+ Switch (J9226A), all other Aruba 2920G Series switches support PoE+ (IEEE 802.3at) and PoE (IEEE 802.3af) standards. The Aruba 2920G-48P PoE+ Switch (J9226A) supports IEEE 802.3at PoE+ and IEEE 802.3af PoE. All other Aruba 2920G Series switches support IEEE 802.3af PoE. All Aruba 2920G Series switches support IEEE 802.3at PoE+ and IEEE 802.3af PoE.

Table 6. Power Consumption (W)

| Model | Power Budget (W) | Power Consumption (W) |
|-----------------|------------------|-----------------------|
| Aruba 2920G-24P | 110 | 100 |
| Aruba 2920G-48P | 220 | 200 |

Table 7. Power Consumption (W)

Cisco Catalyst Multicredit Ethernet

On May 1st, 1865, the government of the United States, through the War Department, issued a general order to all the military departments, commanding them to "cease all hostilities against the rebels, and to accept their submission." This order was issued at the same time as the order to General Grant to "cease all hostilities against Lee's army," and it was issued at the same time as the order to General Sherman to "cease all hostilities against Johnston's army." The order to General Grant was issued at the same time as the order to General Sherman, and it was issued at the same time as the order to General Lee.

- The open-loop gain of the system is $G(s) = \frac{K}{s^2 + 2\zeta\omega_n s + \omega_n^2}$.
 - The closed-loop poles are $s = -\zeta\omega_n \pm j\sqrt{\omega_n^2 - \zeta^2\omega_n^2}$.
 - The transient response is $x(t) = e^{-\zeta\omega_n t} \left(C_1 \cos(\sqrt{1-\zeta^2}\omega_n t) + C_2 \sin(\sqrt{1-\zeta^2}\omega_n t) \right)$.
 - The steady-state error is $\text{ess} = \frac{1}{1 + K \cdot \zeta \omega_n}$.

For the purpose of this document, the following definitions apply:

“Contractor” means the company:

“Customer” means the company:

“Delivery Date” means the date on which the Contractor will supply the Customer with the goods or services.

“Delivery Location” means:

“Delivery Note” means the note attached to the delivery document.

“Delivery Period” means:

“Delivery Point” means the point at which the Contractor will supply the Customer with the goods or services.

“Delivery Time” means the time at which the Contractor will supply the Customer with the goods or services.

“Delivery Type” means the type of delivery:

| Delivery Type | Description | Delivery Period |
|-----------------|-----------------------------|-------------------|
| Delivery Type A | Delivery Type A Description | Delivery Period A |
| Delivery Type B | Delivery Type B Description | Delivery Period B |
| Delivery Type C | Delivery Type C Description | Delivery Period C |
| Delivery Type D | Delivery Type D Description | Delivery Period D |
| Delivery Type E | Delivery Type E Description | Delivery Period E |
| Delivery Type F | Delivery Type F Description | Delivery Period F |
| Delivery Type G | Delivery Type G Description | Delivery Period G |
| Delivery Type H | Delivery Type H Description | Delivery Period H |
| Delivery Type I | Delivery Type I Description | Delivery Period I |
| Delivery Type J | Delivery Type J Description | Delivery Period J |
| Delivery Type K | Delivery Type K Description | Delivery Period K |
| Delivery Type L | Delivery Type L Description | Delivery Period L |
| Delivery Type M | Delivery Type M Description | Delivery Period M |
| Delivery Type N | Delivery Type N Description | Delivery Period N |
| Delivery Type O | Delivery Type O Description | Delivery Period O |
| Delivery Type P | Delivery Type P Description | Delivery Period P |
| Delivery Type Q | Delivery Type Q Description | Delivery Period Q |
| Delivery Type R | Delivery Type R Description | Delivery Period R |
| Delivery Type S | Delivery Type S Description | Delivery Period S |
| Delivery Type T | Delivery Type T Description | Delivery Period T |
| Delivery Type U | Delivery Type U Description | Delivery Period U |
| Delivery Type V | Delivery Type V Description | Delivery Period V |

• Disc 2: 85% of the time, the average number of errors committed by the PMSI system was less than 10% of the total errors made by the human operator.

On March 1, 1998, the U.S. Court of Appeals for the First Circuit affirmed the conviction of James C. Coughlin, III, for his role in the Boston Marathon bombing. The First Circuit rejected Coughlin's challenge to the trial court's denial of his motion to suppress evidence seized from his寓所 during a search conducted by the FBI and the Boston Police Department. The First Circuit also rejected Coughlin's challenges to his trial conviction and sentence.

- Assessment and Management of the Child with Epilepsy: A Guide for Primary Care Providers. This document provides practical information for primary care providers about how to identify children with epilepsy, how to manage common seizure types, and how to refer children with epilepsy to specialists.
 - Epilepsy and You: A Guide for Patients and Families. This booklet provides basic information about epilepsy and its treatment, as well as tips for coping with the challenges of living with epilepsy.

Распределение и интеграция услуг

Логика обработки запросов

Логика обработки запросов определяет, каким образом запрос будет обрабатываться. Для этого используется специальный язык программирования, называемый языком логики обработки запросов. Язык логики обработки запросов позволяет определить, какие действия должны быть предприняты в зависимости от различных условий. Это может включать в себя различные действия, такие как обработка запросов, выполнение действий на основе данных запроса, а также управление состоянием системы. Язык логики обработки запросов является важным компонентом, который позволяет эффективно обрабатывать запросы и обеспечивать высокую производительность и надежность системы.

Брандмауър Cisco Catalyst 3850 Series (Cisco Catalyst 3850 Series Firewall) е модуларен мултифункционален комутатор с вградени функции на брандмауър и филтер за трафик. Този комутатор е част от семейство Cisco Catalyst 3850 и е разработен за изпълнение на задачи като:

Софтуерни функции и услуги на Cisco Catalyst 3850 Series комутатор

Софтуерни функции и услуги на Cisco Catalyst 3850 Series комутатор са:

- Грийн комутатор
- Решение за мултимедиа
- Решение за мрежи
- Решение за мрежи със сървъри
- Ефективен трафик

Лесен за операции

Софтуерни функции и услуги на Cisco Catalyst 3850 Series комутатор са:

- Cisco Catalyst Firewall
- Cisco Catalyst Firewall Management
- Cisco Catalyst Firewall Services
- Cisco Catalyst Firewall Services
