

Достъпни Enterprise Network Security

Unifi Gateway The UniFi систем е надеждно и сигурно съединение с външни гравитационни маршрути и рентабилни единици.

Gateway Security The UniFi систем е надеждно и сигурно съединение с външни гравитационни маршрути и рентабилни единици.

Две модели са налични:

- USG-Pro-4 За мониторинг и шифриране фактор и опции за ограничение и десктоп, 1 GHz процесор за максимална хардуерна ускоряване на производителността.
- USG-Състема мониторинг фактор и десктоп, 500 MHz процесор за стандартен хардуер ускорено интегриране.

Мощен Firewall

Изгълъдение

Gateway Security The UniFi предлага разширена функционалност за съхранение и издаване на лични данни.

Удобен VLAN поддръжка

Gateway Security The UniFi до свидетелства виртуални кръгове съединения за сигурност и прехвърляне на трафика.

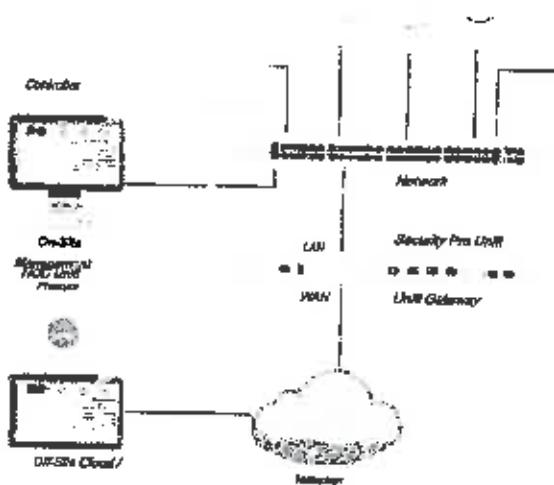

VPN сървер за сигурни комуникации

A VPN сървър ще се конфигурира и криптира чрез прилагане на надеждни, конфиденциални методи.

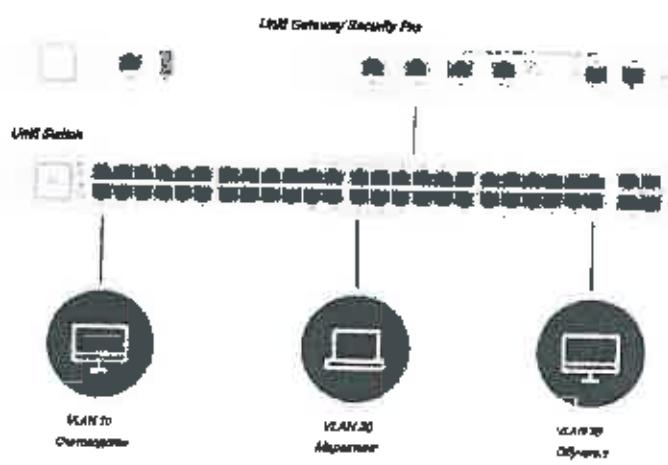

Поддръжка за Enterprise VoIP и видео

Представяващ Тех. Поддръжка на телефони и видео трафики за конфиденциални и безбедни видеотелефонии.

Gateway Security The UniFi осигурява по-евтини начини, както чрез Тех. Поддръжка за безбедни видеотелефонии, използвайки Unifi контролер за премахване на отдалечени устройства, обезличаване и управление.

Пример за система за UniFi Enterprise

Мрежа сегментирана с VLAN

Софта-Съвръм VPN тунел

Unifi Controller

Почистване на нови софтуер Unifi Controller, отворен със свежи
потребителски материали и подготвен за следващото показване на Unifi
устройства.

Подробна работа на потребителите

Програма, която ще ви помогне класично и интелигентно
интерфейс, който ще ви даде ефективността на управление на
които устройствата ви имат. Всички поддържани са преноси на локални
организации и за определени, на които, имате.

Пълни с функции

Интерфейс Unifi за управление на всички Unifi устройства
достъп към Unifi Controller, за мобилни апарати, съборъжения
за управление на трафик, като и представяне на достъпните на Unifi
устройств.

Мрежа Преглед

Цялостен Преглед на всички устройства, кръстен и право достъпна в
този модул за устройства, Монитор за всичките кръстен си и да
изпълни изпълнение на тийнейджър, която е избрана.

Подробни Аналисти

Използвайте конфигуриране на отчети и анализи за наблюдение
за всички прости устройства и зони и промените на
Неконфигурирана. Редовният Търсене и филтрирането за поддържан
принцип употребяван за превърнати по-эффективни.

Управление на Multi-Site

Една Unifi Controller функция е обикновено използването на конфигурация
на устройства, разредените и интегрирани и мулти-предприем
за устройства популът. Всички обект в горичките отворени и на
всички събития конфигурации, карты, отстъпленията дати, работи
за гости, както и централният член на / външни и профили вътре во
член.

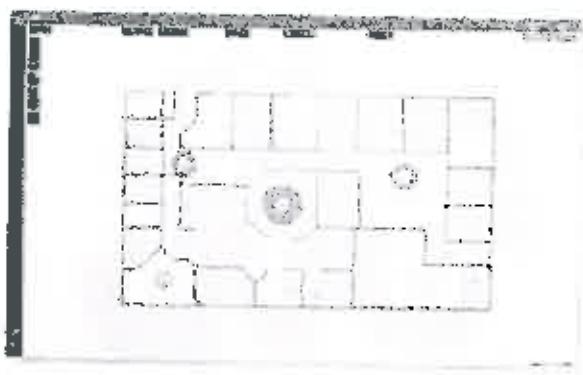

LAN / WLAN Групи

В Unifi контролер може да управлява гънчеви конфигурации на
глобални иконки. Създадени на много LAN и WLAN групи и ги
пълни на състоянието Unifi устройства.

Табло

Unifi конфигурирана извличащо предложение за състоянието на кръстен си и предоставя
съществуваща информация за всички съответни устройства.

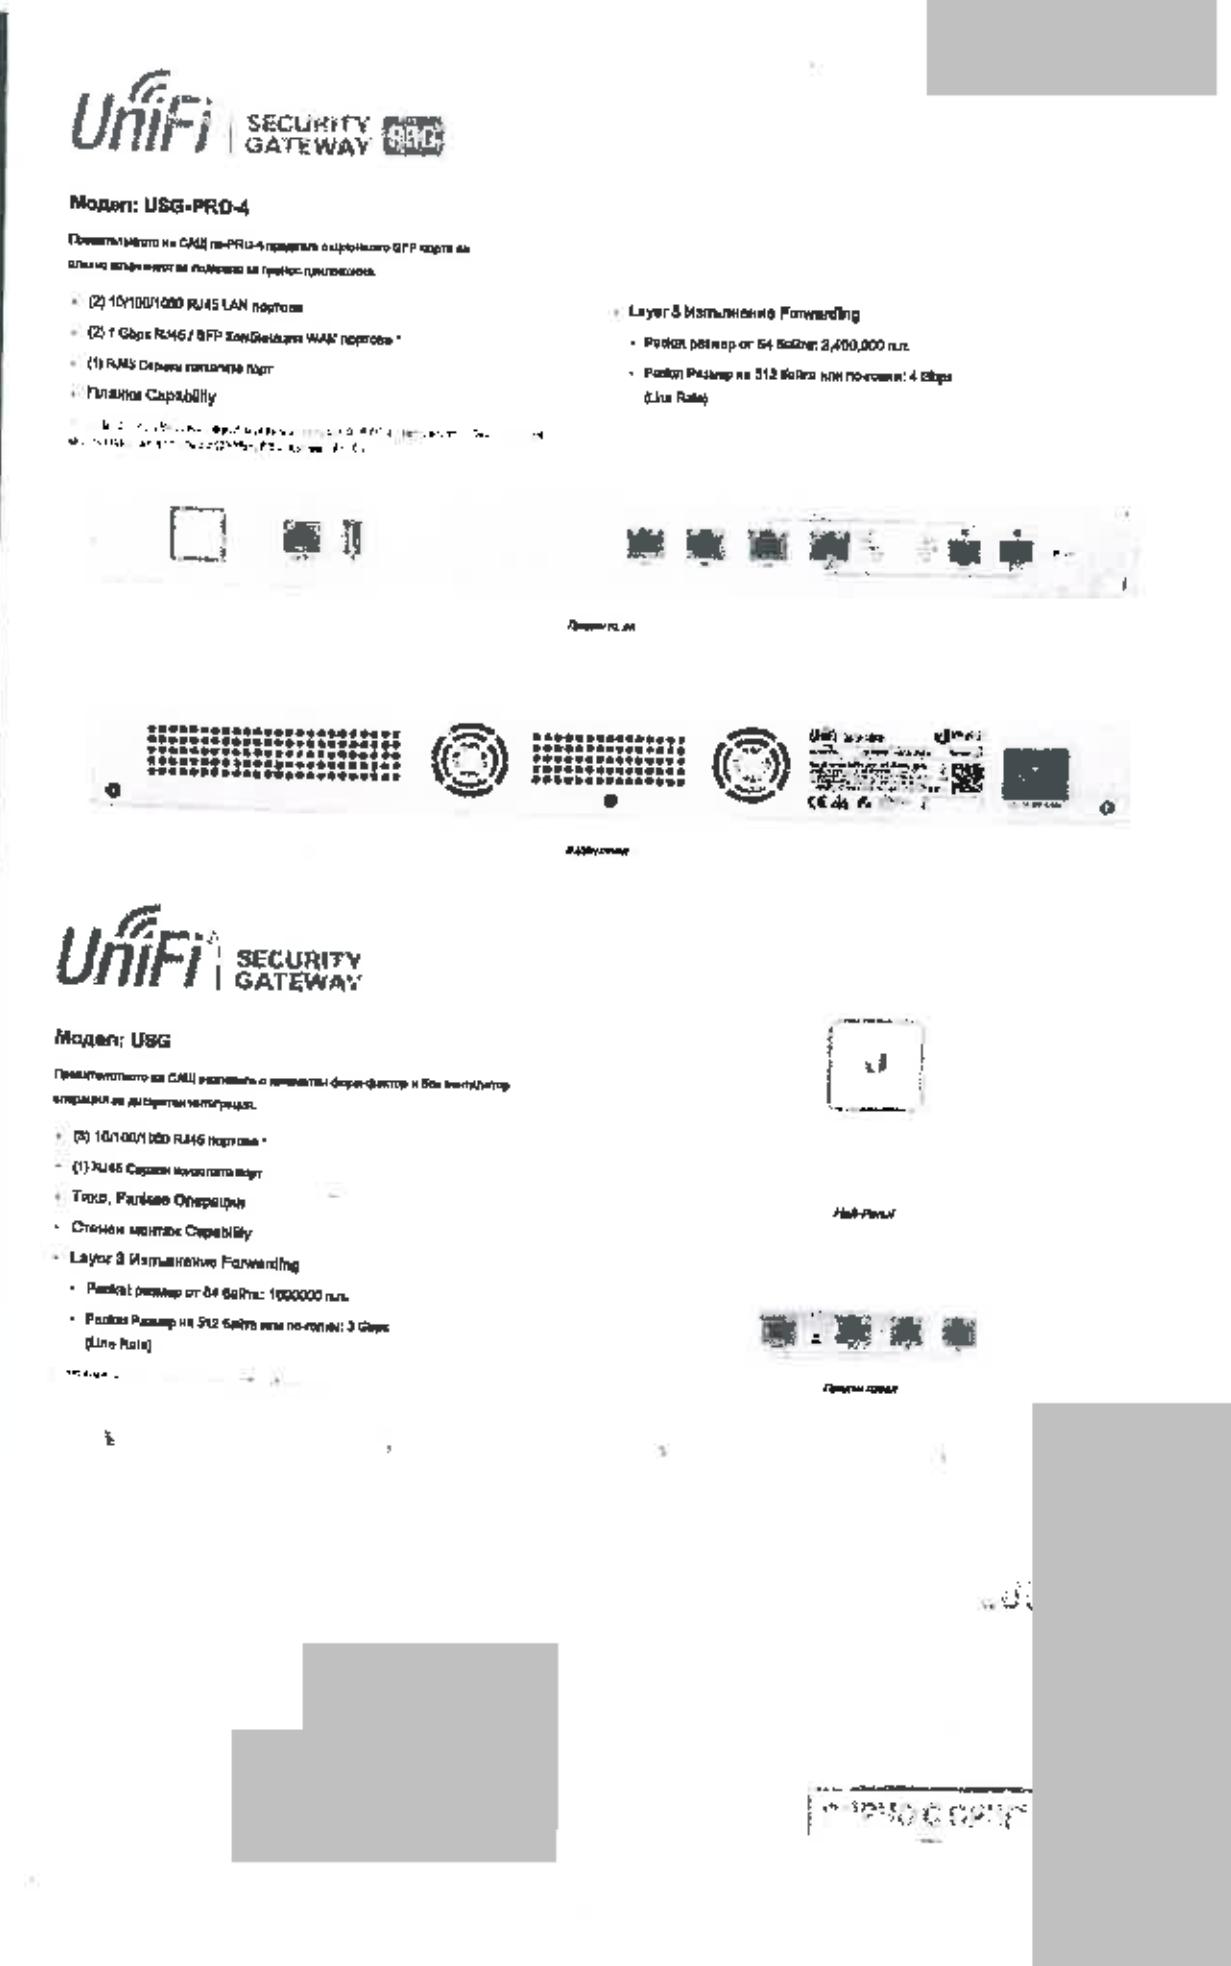

Карти

Конечно на карти на конфигурирането на 10-кила настройките Скори Модул, за да представят
областта, в която ще използвате Unifi устройства. Започните и въвеждете конфигурирането и
функциите прости устройства, когато поправя промените във времето на обекта, този че и същите
помагат да са най-добрият избор.

конфигуриране на устройство

Най- устройства и конфигурирана отворена Unifi устройство, отворено от Unifi контролер. Всички
пътни до всички управляват устройство за подробности за устройството и
они са избрани.

Спецификации

Cisco 250 Series Smart Switches

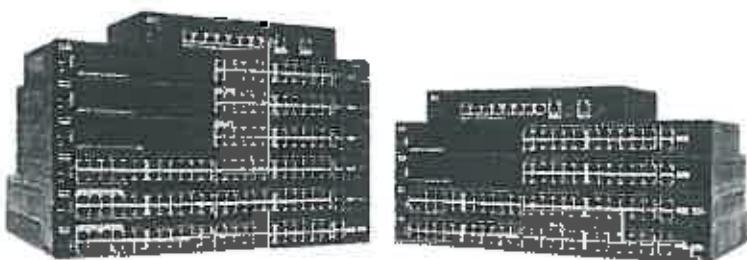

Build a reliable, easy-to-use business network at an affordable price

In today's hyper-connected world, reliable access to network resources is critical to all businesses. However, you also need to invest wisely to stay competitive, knowing how to separate the essential from the extraneous and get the most value for your dollar. For investment in network infrastructure, building a solid foundation for your business is essential, but it doesn't mean you need the most advanced feature set on the market.

For businesses requiring high performance, advanced security, and rich manageability from the network, fully managed switches are an excellent choice. However, they also typically come with high price tags. Smart switches provide the right level of network features and capabilities for growing businesses at a lower price, so you'll have more dollars to put toward other areas of your business.

With Cisco® 250 Series Smart Switches (Figure 1), you can achieve business-class network performance and security without paying for advanced network features that you will not use. When you need a reliable solution to share online resources and connect computers, phones, and wireless access points, but low cost is a top priority, Cisco 250 Series Smart Switches provide the ideal solution.

Figure 1. Cisco 250 Series Smart Switches

The Cisco 250 Series is the next generation of affordable smart switches that combine powerful network performance and reliability with a complete suite of the network features you need for a solid business network. These powerful Fast Ethernet or Gigabit Ethernet switches, with Gigabit or 10 Gigabit Ethernet uplinks, provide multiple management options, sophisticated security capabilities, fine-tuned Quality-of-Service (QoS) and Layer 3 static routing features far beyond those of an unmanaged or consumer-grade switch, at a lower cost than for fully managed switches. And with an easy-to-use web user interface, Smart Network Application, and Power over Ethernet Plus (PoE+) capability, you can deploy and configure a complete business network in minutes.

Business applications

Whether you need basic, high-speed connectivity for your computers and servers or a comprehensive voice and wireless technology solution, Cisco 250 Series switches can meet your business needs. Possible deployment scenarios include:

- **High-speed desktop connectivity:** Cisco 250 Series switches can quickly and securely connect employees working in small offices with one another and with all of the printers, servers, and other devices they use. High performance and reliable connectivity help speed up file transfers and data processing, improve network uptime, and keep your employees productive.
 - **Flexible wireless connectivity:** Cisco 250 Series switches work with Cisco and third-party wireless solutions to extend the reach of your network. With security features, Power over Ethernet (PoE), VLAN, and QoS, these switches are the perfect foundation to add business-grade wireless to a network. The capability of up to 30W of power per port provided through the Ethernet cable means you can easily deploy innovative 802.11ac wireless technology to maximize workforce productivity.
 - **Unified communications:** The Cisco 250 Series provides QoS features to enable you to prioritize delay-sensitive traffic in your network and let you converge all of your communications solutions such as IP telephony and video surveillance onto a single Ethernet network. Cisco offers a complete portfolio of IP telephony and other unified communications products designed for small businesses, and Cisco 250 Series switches have been rigorously tested to help ensure easy integration and full compatibility with these and other vendor products.

Features and benefits

Cisco 250 Series Smart Switches provide all of the features you need to create a basic business-class network at an affordable price. These features include:

- Easy configuration and management: Cisco 250 Series switches are designed to be easy to deploy and use by small businesses or the partners that serve them:
 - Smart Network Application (SNA) is an innovative network-level monitoring and management tool embedded in the Cisco 100 to 500 Series switches. It can discover network topology, display link status, monitor events, apply configurations, and upgrade software images across multiple switches in the network.
 - The FindIT Network Manager and Probe are designed to manage Cisco 100 to 500 Series switches, routers, and wireless access points. They let you proactively manage the network instead of just reacting to events. Cisco 250 Series switches support the embedded FindIT Network Probe, eliminating the need to set up a separate hardware or virtual machine on site. For more information, visit <https://www.cisco.com/c/en/us/products/cloud-systems-management/findit-network-management/index.html>.
 - The FindIT Network Discovery Utility works through a simple toolbar on the user's web browser to discover Cisco devices on the network and display basic device information, inventory, and new firmware updates to aid in the configuration and speed the deployment of Cisco Small Business products. For more information, visit <https://www.cisco.com/c/en/us/products/cloud-systems-management/small-business-findit-network-discovery-utility/index.html>.
 - Simple or advanced-mode graphic user interfaces reduce the time required to deploy, troubleshoot, manage the network. Configuration Wizards simplify the most common configuration tasks and provide the ultimate tool for anyone to set up and manage the network.

- Cisco Smartports technology provides more advanced capabilities and hands-on control by automatically configuring ports with specific levels of security, QoS, and availability according to the type of connected device, based on Cisco best practices and pretested configurations. The Auto Smartports feature automatically applies the intelligence delivered through the Smartports roles to the port based on the device types discovered over Cisco Discovery Protocol or LLDP-MED. This capability facilitates zero-touch deployments.
- The USB port on the front panel of the switch enables easy image and configuration transfer for faster deployment or upgrades.
- **Reliability and performance:** Cisco 250 Series switches have been tested to deliver the high performance and reliability you would expect from a Cisco switch and help you prevent costly downtime. The switches speed file transfer times, improve slow and sluggish networks, keep your vital business applications available, and help your employees respond more quickly to customers and each other. With a network based on Cisco 250 Series switches, you can address all of your business communications and connectivity needs and reduce the total cost of ownership of your technology infrastructure. Cisco 250 Series switches also support 10 Gigabit Ethernet uplinks on select models, so you can build a high-performance and future-ready network to support your thriving business.
- **Layer 3 static routing:** This capability allows you to segment your network into separate workgroups and communicate across VLANs without degrading application performance. As a result, you can manage internal routing with your switches and dedicate your router to external traffic and security, helping your network run more efficiently.
- **Power over Ethernet Plus (PoE+):** Cisco 250 Series switches are available with PoE+ on both Fast Ethernet and Gigabit Ethernet models. This capability simplifies the deployment of IP telephony, wireless, video surveillance, and other solutions by allowing you to send data and power to network endpoints over the single network cable, eliminating the need for separate power supplies or outlets. PoE+ provides up to 30W of power per port, enabling deployments for 802.11ac wireless access points, Pan-Tilt-Zoom (PTZ) IP cameras, videophones, and thin client devices, delivering more flexibility and investment protection.
- **PoE powered device and PoE pass-through:** The 10-port compact models of Cisco 250 Series can work as PoE powered devices and draw power from upstream PoE switches in the wiring closet, simplifying the deployment in meeting rooms, classrooms, hotel rooms, and other flexible locations. Each switch can accept up to 60W of power per uplink port to power itself and pass through the power to the downstream PoE end devices if needed.
- **Network security:** Cisco 250 Series switches provide the security and network management features you need to maintain a high level of security for your business, keep unauthorized users off the network, and protect your business data. The switches include integrated network security to reduce the risk of a security breach, with IEEE 802.1X port security to control access to your network, Denial-of-Service (DoS) attack prevention to increase network uptime during an attack, and extensive Access Control Lists (ACLs) to protect sensitive portions of the network from unauthorized users and guard against network attacks.
- **IPv6 support:** As the IP network addressing scheme evolves to accommodate more devices, you can peace of mind that your network is ready. Cisco 250 Series switches provide native support for IPv6 alongside traditional IPv4. With USGv6 and IPv6 Gold Logo certifications, the 250 Series will enable you to take full advantage of IPv6-enabled operating systems and applications in the future, without having to upgrade your network equipment.

- **IP telephony support:** Cisco 250 Series switches include QoS features to prioritize delay-sensitive services such as voice and video, simplify unified communications deployments, and help ensure consistent network performance for all services.
- **Networkwide automatic voice deployment:** Using a combination of Cisco Discovery Protocol, LLDP-MED, Auto Smartports, and Voice Services Discovery Protocol (VSDP, a unique, patented Cisco protocol), customers can deploy an end-to-end voice network dynamically. The switches in the network automatically converge into a single voice VLAN and set of QoS parameters and then propagate them out to the phones on the ports where they are discovered. For example, automated voice VLAN capabilities let you plug any IP phone (including third-party phones) into your IP telephony network and receive an immediate dial tone. The switch automatically configures the device with the right VLAN and QoS parameters to prioritize voice traffic.
- **An energy-efficient solution:** Cisco 250 Series switches are designed to be energy efficient and eco friendly without compromising performance. They help conserve energy by optimizing power use, which helps protect the environment and lowers your energy costs. Power-saving features include:
 - Support for the Energy Efficient Ethernet (IEEE 802.3az) standard, which reduces energy consumption by monitoring the amount of traffic on an active link and putting the link into a sleep state during quiet periods
 - Automatic power shutoff on ports when a link is down
 - Embedded intelligence to adjust power based on cable length
 - Fanless design in most models, which reduces power consumption, increases reliability, and provides quieter operation
 - Ability to turn off LEDs to conserve power
- **Peace of mind and investment protection:** Cisco 250 Series switches offer the reliable performance, investment protection, and peace of mind you expect from a Cisco switch. When you invest in the Cisco 250 Series, you gain the benefits of:
 - Cisco limited lifetime warranty to protect your investment
 - Rigorous testing to help ensure easy integration and compatibility with other Cisco networking and communications products, including the complete Cisco Small Business portfolio
- **Limited lifetime warranty:** The Cisco 250 Series switches come with the Cisco limited lifetime hardware warranty, with return-to-factory replacement, software updates for bug fixes for the warranty term, and 1-year limited warranty for fans and power supplies. In addition, Cisco offers telephone technical support at no charge for the first 12 months following the date of purchase. To download software updates, go to <https://www.cisco.com/cisco/web/download/index.html>.
- **World-class support:** To extend the support coverage beyond the warranty provisions, choose Cisco Smart Net Total Care™, which helps you get the most value from Cisco Small Business solutions, peace of mind at an affordable price. Cisco Smart Net Total Care provides a single service platform for Cisco networking products. With global coverage, flexible contract terms, and multiple advance hardware replacement options, this comprehensive service includes software upgrades, access to the Cisco Business Support Center, and extended telephone and online chat support. To learn more, visit <https://www.cisco.com/c/en/us/solutions/small-business/services.html>.

To find out where Cisco Small Business Support Service is available by country, go to <https://supportforums.cisco.com/t5/regional-service-support-options/bd-p/4826-discussions-about-country>.

- Multiple language options:** The Cisco 250 Series switches are available in multiple languages. Product documentation and user interfaces are translated, giving you the ability to select your preferred language.

Product specifications

Table 1 describes product specifications.

Table 1. Product specifications

| Feature | Description | | |
|--|-------------|---|--|
| Performance | | | |
| Switching capacity and forwarding rate All switches are wire-speed and nonblocking | Model | Capacity in millions of packets per second (pps) (64-byte packets) | Switching capacity in gigabits per second (Gbps) |
| | SG250-24 | 8.52 | 12.8 |
| | SG250-24P | 9.52 | 12.8 |
| | SG250-48 | 13.10 | 17.6 |
| | SG250-48HP | 13.10 | 17.6 |
| | SG250-60 | 11.80 | 16.0 |
| | SG250-60HP | 11.90 | 16.0 |
| | SG250-10P | 14.58 | 20.0 |
| | SG250-16 | 26.78 | 36.0 |
| | SG250-26 | 38.69 | 52.0 |
| | SG250-26HP | 38.69 | 52.0 |
| | SG250-28P | 38.68 | 52.0 |
| | SG250-50 | 74.41 | 100.0 |
| | SG250-50HP | 74.41 | 100.0 |
| | SG250-80P | 74.41 | 100.0 |
| | SG250X-24 | 85.23 | 128.0 |
| | SG250X-24P | 95.23 | 128.0 |
| | SG250X-48 | 130.94 | 176.0 |
| | SG250X-48P | 130.94 | 176.0 |
| Layer 2 switching | | | |
| Spanning Tree Protocol (STP) | | Standard 802.1d spanning tree support Fast convergence using 802.1w (Rapid Spanning Tree Protocol [RSTP]), enabled by default Multiple spanning tree instances using 802.1s (MSTP); 8 instances are supported | |
| Port grouping/link aggregation | | Support for IEEE 802.3ad Link Aggregation Control Protocol (LACP) <ul style="list-style-type: none">▪ Up to 4 groups▪ Up to 8 ports per group with 16 candidate ports for each (dynamic) 802.3ad LAG | |
| VLAN | | Support for up to 256 active VLANs simultaneously Port-based and 802.1Q tag-based VLANs Management VLAN Guest VLAN | |
| Voice VLAN | | Voice traffic is automatically assigned to a voice-specific VLAN and treated with appropriate Java Auto voice capabilities deliver network-wide zero-touch deployment of voice endpoints and call control | |
| Generic VLAN Registration Protocol (GVRP) and Generic Attribute Registration Protocol (GARP) | | Protocols for automatically propagating and configuring VLANs in a bridged domain | |
| IGMP (Versions 1, 2, and 3) snooping | | Informed Group Management Protocol (IGMP) limits bandwidth-intensive multicast traffic to only the requesters. Supports 4K multicast groups (round-robin multicasting is also supported) | |

| Feature | Description |
|--------------------------------------|--|
| IGMP querier | Used to support a Layer 2 multicast domain of snooping switches in the absence of a multicast router. |
| HOL blocking | Head-Of-Line (HOL) blocking |
| Loopback detection | Provides protection against loops by transmitting loop protocol packets out of ports on which loop protection has been enabled. It operates independently of STP. |
| Layer 3 routing | |
| IPv4 routing | Wire-speed routing of IPv4 packets Up to 32 static routes and up to 16 IP interfaces |
| IPv6 routing | Wire-speed routing of IPv6 packets |
| Layer 3 interface | Configuration of Layer 3 interface on physical port, LAG, VLAN interface, or loopback interface |
| Classless Interdomain Routing (CIDR) | Support for CIDR |
| DHCP relay & Layer 3 | Relay of DHCP traffic across IP domains |
| User Datagram Protocol (UDP) relay | Relay of broadcast information across Layer 3 domains for application discovery or relaying of bootP/DHCP packets |
| Security | |
| SSL | Secure Sockets Layer (SSL) encrypts all HTTPS traffic, allowing secure access to the browser-based management GUI in the switch. |
| Secure Shell (SSH) Protocol | SSH is a secure replacement for Telnet traffic. Secure Copy (SCP) also uses SSH. SSH v1 and v2 are supported. |
| IEEE 802.1X (authenticator role) | RADIUS authentication, guest VLAN, single/multiple host mode, and single/multiple sessions |
| Secure Core Technology (SCT) | Ensures that the switch will receive and process management and protocol traffic no matter how much traffic is received |
| Secure Sensitive Data (SSD) | A mechanism to manage sensitive data (such as passwords, keys, and so on) securely on the switch, populating this data to other devices, and secure autoconfig. Access to view the sensitive data as plaintext or encrypted is provided according to the user-configured access level and the access method of the user. |
| Port security | Ability to lock source MAC addresses to ports and limit the number of learned MAC addresses |
| RADIUS | Supports RADIUS authentication for management access. Switch functions as a client. |
| Storm control | Broadcast, multicast, and unknown unicast |
| DoS prevention | Dos-of-Service (DoS) attack prevention |
| Access Control Lists (ACLs) | Support for up to 256 rules Drop or rate limit based on source and destination MAC, VLAN ID or IP address, protocol, port, differentiated services code point (DSCP/IPvP precedence, TCP/UDP source and destination ports, 802.1p priority, Ethernet type, Internet Control Message Protocol (ICMP) packets, IGMP packets, TCP flag) |
| STP loopback guard | Provides additional protection against Layer 2 forwarding loops (STP loops) |
| Quality of service | |
| Priority levels | 8 hardware queues |
| Scheduling | Strict priority and Weighted Round-Robin (WRR) queue assignment based on DSCP and class of service (802.1p/CoS) |
| Class of service | Port based: 802.1p VLAN priority based; IPv4/IPv6 IP precedence/Type of Service (ToS)/DSCP based; Differentiated Services (DiffServ); classification and re-ranking ACLs; trusted CoS |
| Rate limiting | Ingress policing, egress shaping and rate control, per VLAN, per port, and flow based |
| Congestion avoidance | |
| Standards | A TCP congestion avoidance algorithm is required to reduce and prevent global TCP loss synchronization |
| Standards | IEEE 802.3 10BASE-T Ethernet, IEEE 802.3u 100BASE-TX Fast Ethernet, IEEE 802.3ab 1000BASE-T Gigabit Ethernet, IEEE 802.3ad Link Aggregation Control Protocol, IEEE 802.3z Gigabit Ethernet, IEEE 802.3x Flow Control, IEEE 802.3 ad LACP, IEEE 802.1D (STP), IEEE 802.1Q VLAN, IEEE 802.1w RSTP IEEE 802.1s Multiple STP, IEEE 802.1x Port Access Authentication, IEEE 802.3af, IEEE 802.3at, RFC 783, RFC 791, RFC 792, RFC 793, RFC 813, RFC 879, RFC 880, RFC 826, RFC 844, RFC 855, RFC 856, RFC 858, RFC 854, RFC 919, RFC 920, RFC 922, RFC 926, RFC 981, RFC 1042, RFC 1071, RFC 1123, RFC 1141, RFC 1156, RFC 1157, RFC 1213, RFC 1216, RFC 1286, RFC 1359, RFC 1442, RFC 1451, RFC 1483, RFC 1533, RFC 1541, RFC 1542, RFC 1573, RFC 1624, RFC 1849, RFC 1700, RFC 1767, RFC 1867, RFC 1907, RFC 2011, RFC 2012, RFC 2013, RFC 2030, RFC 2131, RFC 2132, RFC 2220, RFC 2678, RFC 2616, RFC 2618, RFC 2688, RFC 2686, RFC 2674, RFC 2737, RFC 2818, RFC 2863, RFC 3164, RFC 3411, RFC 3412, RFC 3413, RFC 3414, RFC 3415, RFC 3416, RFC 4330 |

| Feature | Description |
|---|---|
| IPv6 | |
| IPv6 | IPv6 host mode IPv6 over Ethernet Dual IPv6/IPv4 stack IPv6 neighbor and Router Discovery (ND) IPv6 stateless address auto configuration Path Maximum Transmission Unit (PMTU) discovery Duplicate Address Detection (DAD) Internet Control Message Protocol (ICMP) version 6 IPv6 over IPv4 network with Intraface Automatic Tunnel Addressing Protocol (ISATAP) support USGv6 and IPv6 Gold Logo certified |
| IPv6 QoS | Prioritize IPv6 packets in hardware |
| IPv6 ACL | Drop or rate limit IPv6 packets in hardware |
| Multicast Listener Discovery (MLD v1/v2) snooping | Deliver IPv6 multicast packets only to the required receivers |
| IPv6 applications | WebSSO, Telnet server/SSH, Ping, Traceroute, Simple Network Time Protocol (SNTP), Trivial File Transfer Protocol (TFTP), Simple Network Management Protocol (SNMP), Remote Authentication Dial-In User Service (RADIUS), Syslog, DNS client, DHCP client, DHCP autoconfig |
| IPv6 RFCs supported | RFC 4449 (which obsoletes RFC 2463) ICMPv6 RFC 4291 (which obsoletes RFC 3513) IPv6 address architecture RFC 4291 IPv6 Addressing Architecture RFC 2480 IPv6 Specification RFC 4611 (which obsoletes RFC 2461) Neighbor Discovery for IPv6 RFC 4862 (which obsoletes RFC 2462) IPv6 Stateless Address Autoconfiguration RFC 1981 Path MTU Discovery RFC 4007 IPv6 Scoped Address Architecture RFC 3484 Default address selection mechanism RFC 4214 (which obsoletes RFC 4214) ISATAP tunnelling RFC 4294 MB IPv6 Technical Conventions and General Group RFC 3985 Technical Conventions for IPv6 Flow Label |
| Management | |
| Web user interface | Built-in switch configuration utility for easy browser-based device configuration (HTTP/HTTPS). Supports configuration, wizards, system dashboard, system maintenance, and monitoring Basic and advanced mode for maximum operational efficiency |
| Smart Network Application (SNA) | An innovative network-level monitoring and management tool embedded in Cisco 2900 to 5500 Series switches. It can discover network topology, display link status, monitor events, apply configurations, and upgrade software images across multiple switches in the network |
| SNMP | SNMP versions 1, 2c, and 3 with support for traps, and eSNMP v3 User-based Security Model (USM) |
| Standard MIBs | ifd-IF-MIB ifd-pseudointf-MIB ifd-pseudointf-MIB ifd-pseudointf-MIB rfc2674-MIB rfc2675-MIB rfc2673-MIB rfc2233-MIB rfc2013-MIB rfc2012-MIB rfc2011-MIB RFC-1212 RFC-1215 SNMPv2-COMF SNMPv2-TG p-bridge-MIB draft-ietf-lldp-802.1x-MIB draft-ietf-llmnr-dhcp-04-MIB draft-ietf-huawei-etharp-v3-00-1 draft-ietf-taiolog-04-ace-MIB zeroconf-dynamic-mib-MIB ianaifiv-MIB |

| Remote monitoring (RMON) | Embedded RMON software agent supports 4 RMON groups (history, statistics, alarms, and events) for enhanced traffic management, monitoring, and analysis. |
| IPv4 and IPv6 dual stack | Coexistence of both protocol stacks to ease migration |
| Firmware upgrade | Web browser upgrade (HTTP/HTTPS) and TFTP and upgrade over SCP running over SSH |
| Port mirroring | Traffic on a port can be mirrored to another port for analysis with a network analyzer or RMON probe. Up to 4 source ports can be mirrored to one destination port |
| VLAN mirroring | Traffic from a VLAN can be mirrored to a port for analysis with a network analyzer or RMON probe. Up to 4 source VLANs can be mirrored to one destination port |
| Dynamic Host Configuration Protocol (DHCP) (options 12, 66, 67, 128, and 160) | DHCP options facilitateighter control from a central point (DHCP server), to obtain IP address, autoconfiguration (with configuration file download), DHCP Relay, and host name |
| Secure Copy (SCP) | Securely transfers files to and from the switch |
| Autoconfiguration with SCP file download | Enables mass deployment with protection of sensitive data |
| Text-editable config | Config files can be edited with a text editor and downloaded to another switch, facilitating easier mass deployment |
| Smartports | Simplified configuration of QoS and security capabilities |
| Auto-Smartports | Automatically applies the intelligence delivered through the Smartports roles to the port based on the devices discovered over Cisco Discovery Protocol or LLDP-MED. This facilitates zero-touch deployments |
| Terminal Command-Line Interface (CLI) | Scriptable CLI. A full CLI as well as a menu-based CLI is supported. User privilege levels 1, 7, and 15 are supported for the CLI |
| Cloud services | Support for Cisco FindIT Network Manager and Cisco Active Advisor |
| Embedded FindIT Network Probe | Support for embedded FindIT Network Probe running on the switch. Eliminates the need to set up a separate hardware or virtual machine for the FindIT Network Probe on site |
| Cisco Network Plug and Play (PNP) agent | The Cisco Network Plug and Play solution provides a simple, secure, unified, and integrated offering to ease new branch or campus device rollouts or for provisioning updates to an existing network. The solution provides a unified approach to provision Cisco routers, switches, and wireless devices with a near-zero-touch deployment experience |
| Localization | Localization of GUI and documentation into multiple languages |
| Login banner | Configurable multiple banners for web as well as CLI |
| Other management | Traceroute; single IP management; HTTP/HTTPS; RADIUS; port mirroring; TFTP Upgrade; DHCP client; Simple Network Time Protocol (SNTP); cable diagnostics; Ping; syslog; Telnet client (SSH secure support); automatic time settings from Management Station |
| Green (power efficiency) | |
| Energy detect | Automatically turns power off on RJ-45 port when detecting link down. Active mode is resumed without loss of any packets when the switch detects the link is up |
| Cable length detection | Adjusts the signal strength based on the cable length. Reduces the power consumption for short cables |
| IEEE compliant (802.3az) | Supports IEEE 802.3az on all copper Gigabit Ethernet ports |
| Disable port LEDs | LEDs can be manually turned off to save on energy |
| Time-based port operation | Link up or down based on user-defined schedule (when the port is administratively up) |
| Time-based PoE | PoE power can be on or off based on user-defined schedule to save energy |
| General | |
| Jumbo frames | Frame sizes up to 9K bytes. The default MTU is 2K bytes |
| MAC table | 8K addresses |

| Discovery | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Bonjour | The switch advertises itself using the Bonjour protocol. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Link Layer Discovery Protocol (LLDP) (802.1ab) with LLDP-MED extensions | Link Layer Discovery Protocol (LLDP) allows the switch to advertise its identification, configuration, and capabilities to neighboring devices that store the data in a MIB. LLDP-MED is an enhancement to LLDP that adds the information needed for IP phones. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Cisco Discovery Protocol | The switch advertises itself using the Cisco Discovery Protocol. It also learns the connected device and its characteristics using Cisco Discovery Protocol. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Product specifications | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 802.3af PoE+ and 802.3at PoE delivered over any of the RJ-45 ports within the listed power budgets | The following switches support 802.3af PoE+, 802.3at, and Cisco prestandard (legacy) PoE. Maximum power of 30.0W to any 10/100 or Gigabit Ethernet port, until the PoE budget for the switch is reached. The total power available for PoE per switch is as follows: | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| | <table border="1"> <thead> <tr> <th>Model</th><th>Power allocated to PoE</th><th>Number of ports that support PoE</th></tr> </thead> <tbody> <tr> <td>SF250-24P</td><td>186W</td><td>34</td></tr> <tr> <td>SF250-48P</td><td>195W</td><td>48</td></tr> <tr> <td>SG250-08HP</td><td>43W</td><td>8</td></tr> <tr> <td>SG250-10P</td><td>62W</td><td>8</td></tr> <tr> <td>SG250-28HP</td><td>100W</td><td>24</td></tr> <tr> <td>SG250-26P</td><td>196W</td><td>24</td></tr> <tr> <td>SG250-50HP</td><td>192W</td><td>48</td></tr> <tr> <td>SG250-50P</td><td>375W</td><td>48</td></tr> <tr> <td>SG280X-24P</td><td>195W</td><td>24</td></tr> <tr> <td>SG280X-48P</td><td>382W</td><td>48</td></tr> </tbody> </table> | Model | Power allocated to PoE | Number of ports that support PoE | SF250-24P | 186W | 34 | SF250-48P | 195W | 48 | SG250-08HP | 43W | 8 | SG250-10P | 62W | 8 | SG250-28HP | 100W | 24 | SG250-26P | 196W | 24 | SG250-50HP | 192W | 48 | SG250-50P | 375W | 48 | SG280X-24P | 195W | 24 | SG280X-48P | 382W | 48 | | | | | | | | | | | |

Ordering Information

Table 2 provides ordering information.

Table 2 Ordering Information

| Model name | Product order ID number | Description |
|-------------------------|-------------------------|---|
| Fast Ethernet | | |
| SF250-24 | SF250-24-K9-xx | <ul style="list-style-type: none"> ▪ 24 10/100 ports ▪ 2 Gigabit copper/SFP combo + 2 SFP ports |
| SF250-24P | SF250-24P-K9-xx | <ul style="list-style-type: none"> ▪ 24 10/100 PoE+ ports with 16W power budget ▪ 2 Gigabit copper/SFP combo + 2 SFP ports |
| SF250-48 | SF250-48-K9-xx | <ul style="list-style-type: none"> ▪ 48 10/100 ports ▪ 2 Gigabit copper/SFP combo + 2 SFP ports |
| SF250-48HP | SF250-48HP-K9-xx | <ul style="list-style-type: none"> ▪ 48 10/100 PoE+ ports with 16W power budget ▪ 2 Gigabit copper/SFP combo + 2 SFP ports |
| Gigabit Ethernet | | |
| SG250-08 | SG250-08-K9-xx | <ul style="list-style-type: none"> ▪ 8 10/100/1000 ports (Port 8 with PoE+ power input support) |
| SG250-08HP | SG250-08HP-K9-xx | <ul style="list-style-type: none"> ▪ 8 10/100/1000 PoE+ ports with 40W power budget |
| SG250-10P | SG250-10P-K9 | <ul style="list-style-type: none"> ▪ 8 10/100/1000 PoE+ ports with 62W power budget ▪ 2 Gigabit copper/SFP combo ports with 60W PoE power input support |
| SG250-18 | SG250-18-K9-xx | <ul style="list-style-type: none"> ▪ 18 10/100/1000 ports ▪ 2 Gigabit copper/SFP combo ports |
| SG250-24 | SG250-24-K9-xx | <ul style="list-style-type: none"> ▪ 24 10/100/1000 ports ▪ 2 Gigabit copper/SFP combo ports |
| SG250-24HP | SG250-24HP-K9-xx | <ul style="list-style-type: none"> ▪ 24 10/100/1000 PoE+ ports with 100W power budget ▪ 2 Gigabit copper/SFP combo ports |
| SG250-28P | SG250-28P-K9-xx | <ul style="list-style-type: none"> ▪ 24 10/100/1000 PoE+ ports with 16W power budget ▪ 2 Gigabit copper/SFP combo ports |

| Product model | Product order ID number | Description |
|----------------------------|-------------------------|--|
| SG250-26 | SG250-26-K9-xx | <ul style="list-style-type: none"> • 48 10/100/1000 ports • 2 Gigabit copper/SFP combo ports |
| SG250-48HP | SG250-48HP-K9-xx | <ul style="list-style-type: none"> • 48 10/100/1000 PoE+ ports with 192W power budget • 2 Gigabit copper/SFP combo ports |
| SG250-50P | SG250-50P-K9-xx | <ul style="list-style-type: none"> • 48 10/100/1000 PoE+ ports with 276W power budget • 2 Gigabit copper/SFP combo ports |
| 10 Gigabit Ethernet | | |
| SG250X-24 | SG250X-24-K9-xx | <ul style="list-style-type: none"> • 24 10/100/1000 ports • 4 10 Gigabit Ethernet (2 x 10GBASE-T + 2 x SFP+) |
| SG250X-24P | SG250X-24P-K9-xx | <ul style="list-style-type: none"> • 24 10/100/1000 PoE+ ports with 198W power budget • 4 10 Gigabit Ethernet (2 x 10GBASE-T + 2 x SFP+) |
| SG250X-48 | SG250X-48-K9-xx | <ul style="list-style-type: none"> • 48 10/100/1000 ports • 4 10 Gigabit Ethernet (2 x 10GBASE-T + 2 x SFP+) |
| SG250X-48P | SG250X-48P-K9-xx | <ul style="list-style-type: none"> • 48 10/100/1000 PoE+ ports with 362W power budget • 4 10 Gigabit Ethernet (2 x 10GBASE-T + 2 x SFP+) |

Each combo port has one 10/100/1000 copper Ethernet port and one SFP Gigabit Ethernet slot, with one port active at a time. The -xx in the product order ID number is a country/region specific suffix. For example, the complete P/O of SG250-26 for the United States is SG250-26-K9-NA. Please refer to the following table for the suffix to use for your country/region.

Table 3. Country/region suffix for product order ID number

| Suffix | Country/Region |
|--------|--|
| -NA | USA, Canada, Mexico, Colombia, Chile, and rest of LATAM |
| -BR | Brazil |
| -AR | Argentina |
| -EU | EU, Russia, Ukraine, Israel, UAE, Turkey, Egypt, South Africa, Indonesia, Philippines, Vietnam, Thailand, India, Korea |
| -UK | United Kingdom, Saudi Arabia, Qatar, Kuwait, Singapore, Hong Kong, Malaysia |
| -AU | Australia, New Zealand |
| -CN | China |
| -IN | India |
| -JP | Japan |
| -KR | Korea |

The products may also be available in countries or regions not listed above. Not all product models are offered in all countries/regions. For India, either the -EU or -IN suffix will be used, depending on product models. For Korea, either the -EU or -KR suffix will be used, depending on product models. Please consult with your local Cisco sales representative or Cisco partner for more details.

A powerful foundation for the basic business network

As you strive to make your business more competitive and efficient, every dollar counts. Cisco 250 Series Smart Switches give you just the right features, performance, and reliability you need, without making you pay for advanced features you don't. With Cisco 250 Series switches, you can rest assured that your business applications and communications tools are resting on a strong technology foundation, so you can focus on achieving your business goals.

Cisco Capital

Flexible Payment Solutions to Help You Achieve Your Objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. [Learn more.](#)

Cisco 250 Series от Сиско

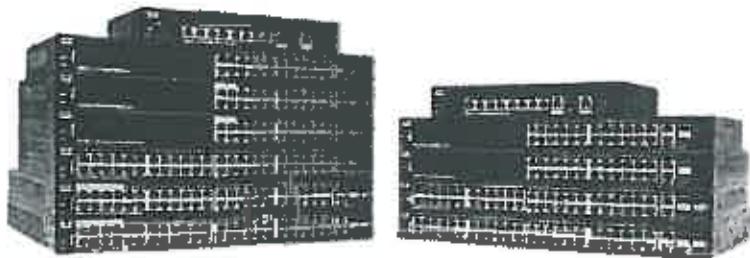

Използвайте изцяло своята съвместна база за търговски и производителни цели.

В днешните източници имат, нарастващи достъп до информационни ресурси и от ръшавещи замъкани за корпоративни бранзи. Въпреки това, вие също трябва да се инновирате резултати да останат конкурентоспособни, да залечате да са фиделизираните от клиенти и да покажете най-добрия начин за да дадете. За инновации в производствена инфраструктура, изградени на основата на този бранз и е съществено значение, но това не съществува, че са поклонени от най-новите функционалности на нашия.

За производителя, инновации във всяка производителност, подобрене въглищност и устойчивост е бил от предвиден, погълнато управление производствен отговорен. Въпреки това, те още толкова обичат да са по-дълги цели. Интелигентни компютри дават възможност за необходимите нови производителни функции и технологии да се приложат на бранза първичната, като че това е повече фактор, за да променят други обстоятелства на нашата бранза.

Със Cisco 250 Бранз от Сиско (Фигура 1), можете да погълнете базови производителности и инновации на производство, без да изисквате допълнителни функции на производство, че няма да напомняте. Когато натиснете кутията от производство (изпълнение) и споделите го със собствени ресурси и съоръжения на клиенти, телефони и базови компоненти за производство, като машини, ще са основен приоритет, Cisco 250 Бранз от Сиско предоставя единично решение.

Фигура 1. Cisco 250-Бранз от Сиско

В Cisco 250 Бранз е споделено пълното на достъпни централни компютри, които съществува производителността и инновациите на производство със външен набор от функции на производство за складски бранзи промята. Тези можем Fast Ethernet или Gigabit Ethernet компютри с Cisco IOS 10. Същеве Ethernet производителност, предоставят множество възможности за управление, устойчивостта на производствените за инновации, производство и качество на услуги (QoS) и Layer 3 определено маршрутизиране производство да е отворен за всички изпълнения или по требителското юрисдикция, по-нататък ценни, отдавано за пълна устойчивост и производителност. И възможност за използване на веб интерфейс, Application Smart Multicasting и Ethereal Plus (PoE+) способност, позволява да разгърнати и конфигурират пълни бранзи критични за производство.

Базични приложения

Независимо дали ще имате нужда от базична, многофункционална архитектура за външни компютри и първи или централни глас, данни и решението базирано на Cisco 250 Бранз може да отговори на вашите производствени. Възможни сценарии за расположение включват:

- **Балансиране на възлагане и изработка:** Cisco комутатори 250 Series може бързо и сигурно да съхранят конфигурации, работещи в машини във времето с други и във времето преди тях. Всички параметри и конфигурации са съхранени и обновявани във времето на трекера на файлове и обработката на данни, за подобряване на вероятността за избегване на проблеми.
- **Гъвкава брандмауърност:** Cisco 250 Series практиче работи с Cisco и трети страни, брандмауърът е разширен чрез обход на мястото на мрежа. С функция за сигурност, задържане по Ethernet (PoE), VLAN, QoS и така покачен във вероятността основа за добавяне на брандмауърски багажници само.
- **Спълнителни характеристики:** Cisco 250 Series практиче работи чрез Ethernet кабели също, че позволява да имате възможността за подобряване на мястото на мрежа. С функция за сигурност, задържане по Ethernet (PoE), VLAN, QoS и така покачен във вероятността основа за добавяне на брандмауърски багажници само.
- **Унифицирана комуникация:** В Cisco 250 Series осъществява QoS функции, за да им даде възможност да са приоритизират деловий трафик и превоза им и да им дадат възможност да се съблюдават всички от избрани параметри решения като IP телефония и видеоконференции бързо един Едини Мрежи. Cisco практиче пълен портфейл от IP телефонии и други обектови комуникации продукти, предназначени за малки предприятия, и Cisco 250 Series комутатори са естественна, за да имате възможност за съвместна интеграция и използване съвместност с тези и други достъпници продукти.

Характеристики и компоненти

Cisco 250 Series от Cisco предлагат всички функции, които трябва да имате във вашия бизнес-класс мрежи на достъпна цена. Тези функции включват:

- **Пълни конфигурации и управление:** Cisco 250 комутатори от серията са проектирани да бъдат лесни за конфигуриране и използване от малки фирми или малки органи, които ги обслужват.
- **Задължителен Network (SNMP) в интегриран макроконтролер и управление на мрежите на ниво, когато е възможно от версия Cisco 100 до 600. Ти можете да откриете мрежовите топологии, статуса на всички мрежови устройства, конфигурации, както и обновления на софтуера на избрани или избрани устройства в мрежата.**
- **Най-добрите технологии на PoE и също са предвидени за управление на Cisco 100 до 600 от серията комутатори, макроконтролери и блокови точки за достъп. Те ще подгответе да практиче управление на мрежата, възможно чрез дефиниране на топологията. Cisco 250 комутатори от фирмата са поддръжани от Ruijie Network PoE+ и PoE+, които практика и използвате да се определят устройствата и конфигурират мрежата на място. За повече информация, посетете <https://www.cisco.com/cn/en/us/products/switches/managers/index.html>.**
- **В Ruijie Network Datasheetът показваща програмата практиче работи чрез IP-адреса и инструкции на уеб браузъра на потребителя да открие Cisco устройства в мрежата и ще покаже състоянието на конфигурации за управление, макроконтролери, както и нови актуелни на софтуера за поддръжката и конфигурирането и да ускори процеса на Cisco Business Switch за продукти. За повече информация, посетете <https://www.cisco.com/cn/en/us/products/switches/managers/index.html>.**
- **Компактни и малки размери и елегантни дизайни за практика на макроконтролери и конфигурации на мрежата, които позволяват да използвате и конфигурирате конфигурации и конфигурирате конфигурации на мрежата на място да създадете и управлявате мрежата.**

- IP конфигурация и обработка на Cisco 250 компютри от своята като част от обработка на архитектурата на мултитачъм членове за бавни и бързи, да обработи унапредиране на конфигурации и да са перекърснати безпроблемно работи на пренос и за всички членове.

- Решението автоматично разгърши със започването от Cisco Discovery Protocol, LLDP-MED, Auto-Snooping, и гласови услуги. Cisco Discovery Protocol (VSDP), участващата в своя протокол, позволява настройка на мултитачъм членове от край до край динамично. Конфигурираните в мултитачъм членове се съединяват в един еднотипен тип VLAN и коридорите на СБЕ терминал и след това да ги разпространят до логика на пристанищата, които са отворени. Например в тях може да има VLAN, който позволява да включвате само IP телефон (дигитални и физически телефони) или всички членове IP телефони и получавате на тях изваждано на навигация. Принципът на конфигурацията на устройства в дигитални VLAN и СБЕ терминал е приоритетна експресия на трафика на глава.

- Широките ефективности на Cisco 250 компютри от своята като конфигурирана до бърз аудиотрансфер в функцията скритично член, без изгаряне и скъсване. То показва най-добри времена от конфигуриране на мултитачъм членове, което помага конфигурацията на съществуващи бранди и юниони в редица от конфигурирана функцията скритично член.

- Всички аудиофункции на Cisco 250 поддържат IEEE 802.3af стандарт, което значително конкуренцията на мултитачъм членове на базирана на трафика на активни аудио и скъсване и изчезване във времето на сън по време на навигацията на устройството.

- Автоматична настройка на изхранваната единица със, като аудио и факсаду
- Аудио и конфигуриране на конфигурирана мултитачъм членове
- Решение дизайн в повечето избрани, което напомня конкуренцията на Cisco, участвайки в издаването и конфигурирана тази работа

- Възможност за конфигуриране на скритично членове за аудио

- Способстване и защита на издаването: Cisco 250 Series компютри предлагат надеждна работба, забрана на издаването, звук и видеозапис, която не очаква от вашия избран Cisco. Хардуерна инсталацията в единицата Cisco 250, получаващата гулочка от:

- Cisco мултитачъм членове за скритично членове
- Стърги тестови, за да се използват лесни интеграции и съвместимост с други Cisco мултитачъм и комуникационни продукти, включително и пълни Cisco Small Business портфолио
- Стремеж на издаването: предложен от своята Cisco 250 за прилагане с гарнитура на Cisco изхранвана членове, съфтуер и оптимизирана за коравия изгаряващ за брои на гарнитура с 7 радици изразочни и гарнитури за функцията на изхранвана устройство, в допълнение, Cisco предлага телефoni за тънччото, поддръжка, без тънччото 12 месеца от датата на покупката, за да използвате софтуерни радиодиагностики, отворете

<https://www.cisco.com/cisco/meraki/meraki/meraki.html>,

- От своята членове за издаването: За да се убедят бранд на скритично подкрепят издаването на гарнитури на избраната Cisco Smart Net Total Care, която им помага да получате най-доброто от Cisco Small Business решения, оптимизирани според вашите на достъпни цени. Cisco Smart Net Total Care конфигурира различни платформи за обслужване за скритично членове възбуден на Cisco. Опълните покритие, възможни договори и условия, което и ние имаме възможност да поддържаме предварително заради, тези издаването обновяват ежегодно обновявате на устройството на издаването, докато до Центъра за поддръжки и поддържки на Cisco, като и удаляем телефон и опашка членове за издаването, за да използвате издаването, покрайте

<https://www.cisco.com/cisco/meraki/meraki/meraki.html>,

За да разберете членове Cisco Small Business Бранд в други видове поддръжки, отидете на

[https://cisco.com/cisco/meraki/meraki.html](https://cisco.com/cisco/meraki/meraki/meraki.html).

* определено в соответствии с предложенными от Сибнефть Стандартами на реализацию на НПЗ нефти. Доказано пригодно для промышленного применения и соответствует требованиям по эксплуатации.

ЧАСТО ВЪПРОСИ, ЧИСТО ПРИДУЛГА

Таблица 1. Основни спецификации на продукти.

Магн. 1. Спецификации на продукти

| Бензин | Описание | | |
|--|---|--|---|
| Продукти за бензин | | | |
| Бензин с високачествен и стабилен компонент | Бензин | Капацитет в кубически метри в секунда (БС/С) (въз основа на висота) | Блокчейн Аудиторският в търговския сектор |

Часть II

| Название | Описание | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|--|--|---------------------------------------|---------------------------------------|---------------------------------------|---------------------------------------|---------------------------------------|-----------------------|------------------------------|------|-------|----------------|-----------------------|------------------------------|------------------------------|--------|----------|-----------------------|------------------------------|----|--------------|------|-----------|----------------|------|-------|--------------|------|---------------------|--------------|------|-------|---------------|--------------------|----|-------|-------|--|--------------------|-----|--|----|--|---------------------|-----|--|--|--|--------------------|----|--|--|--|-----|--|--|--|
| Логика | Предназначена для выполнения логических операций. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Lisp Layer Discovery Protocol (LLDP) [RFC 6247] и LLDP-MED расширение | Link Layer Discovery Protocol (LLDP) – это протокол передачи конфигурационной информации между устройствами. Несмотря на то что в IP-сетях существует протокол LLDP-MED, который добавляет информацию о качестве услуг в LLDP, но его добавлять не требуется, необходимо использовать IP-трафик. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Сетевая диагностика Protocols | Позволяет осуществлять мониторинг состояния и диагностику различных протоколов от Cisco. Текущий список включает в себя протоколы управления и мониторинга сопоставленных с ними. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Физическая среда | Отображает состояние подключения (Ethernet Port +, Ethernet Port - и Стекинг) и состояние блокировки (блокировка порта) PoE. Максимальная мощность на 28.8W, где с 15.0W или более блокируется выход, до достижения на физическом PoE порте порога, общий ограничитель PoE администратором назначается в меню клиента. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Fiber optic patch cord and pigtail Atop

1. Description

Fiber optic patch cord and pigtail can be classified to FC, SC, LC, MU and ST. With the high-quality ceramic ferrules, it has good conformity and low Insertion Loss. And It is widely used in the Telecommunication Networks, Data Transmission, Test Equipment and the LAN of CATV etc.

2. Features

- ◆ Low insertion loss and high return loss;
- ◆ Good repeatability & interchangeability;
- ◆ PC, UPC, APC polishing; FC, SC, ST, LC, MU connector;
- ◆ Suitable for high-speed, high-capacity optical fiber transmission system;
- ◆ Provide single mode/ multimode patch cord and pigtails;

- ◆ Fiber diameter: Φ0.9mm, Φ2.0mm, Φ3.0mm;
- ◆ Length/Type: according to customers' demands.

3. Application

- > Optical fiber communications system;
- > Optical fiber access networks;
- > Optical fiber CATV;
- > Optical fiber test equipments;
- > Optical fiber data communication;

4. Technical parameters

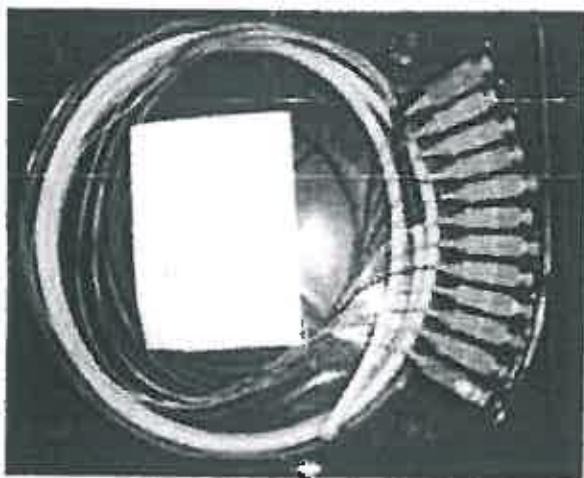

| Item | UPC Polishing | | APC Polishing | | Schematic Diagram |
|-----------------------|---------------|------|---------------|------|-------------------|
| Ferrule Diameter (mm) | 2.5 | 1.25 | 2.5 | 1.25 | |
| Radius of Curv (mm) | 10~25 | 7~25 | 5~12 | | |

| No. | Item | Unit | Single Mode | | | Multi Mode |

| 3 | Repeatability | dB | 0.1 | | | |
| 4 | Working Times | Times | ≥1000 | | | KONTAKT АД 1 |
| 5 | Operating Temperature | °C | -40~+85 | | | |
| 6 | Optical Cable Diameter | | Φ0.9, Φ2.0, Φ3.0 | | | OPHI |

| | | |
|-------------------|-----------|-----------|
| Fiber Height (nm) | -125~50 | ± 100 |
| Apwex Offset (um) | ≤ 50 | ≤ 50 |

5.Package

Оптичен свързващ кабел и питтейл Атоп

1. Описание

Оптичните свързващи кабели и питтейли може да се класифицират на FC, SC, LC, MU и ST. С най-високо качество на керамични накрайници, той има добро съответствие и ниско Включване Загуба. И това се използва широко в телекомуникационните мрежи, пренос на данни, оборудване за изпитване и локалната мрежа на кабелна телевизия и т.н.

2. Характеристики

- ❖ Ниска затихване и висока загуба връщане;
- ❖ Добра повторяемост и взаимозаменяемост;
- ❖ PC, UPC, APC полиране; FC, SC, ST, LC, MU съединител;
- ❖ Подходящ за високи скорости, с голям капацитет оптимни влакна преносна система;
- ❖ Осигуряване на един вид / многомодовото пластир кабел и плитки;

| №. | Вещ | Мерна единица | Ограничение на огън | | | Multi Mode |
|----|---------------------|---------------|----------------------|-----------|-----------|------------|
| 1 | Затихването | dB | ≤ 0.3 | | | ≤ 0.3 |
| 2 | загуба на връщане | db | настолен компютър | UPC | APC | / |
| | | | ≥ 45 | ≥ 50 | ≥ 60 | ≥ 35 |
| 3 | Повторяемост | dB | 0.1 | | | |
| 4 | работната Times | пъти | ≥ 1000 | | | |
| 5 | Работна температура | °C | $-40 \sim +85$ | | | |

SONICWALL

SonicWall Network Security Appliance (NSA) series

The NSA series offers the most advanced security technologies available today.

From firewalling, intrusion prevention, application control to SSL and IPsec VPN, the NSA series is an industry-leading solution for enterprise-class security. With a range of threat protection to fully support today's mobile environment, the NSA series is ready to defend against the latest threats, including DDoS attacks, botnets, worms, viruses, spyware and zero-day exploits. Moreover,

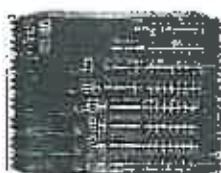

Leading edge threat prevention with superior performance

Today's network environments require security solutions that can identify and respond to threats in real time. SonicWall's unique approach to threat prevention is built on a single, integrated platform that allows you to reduce costs and increase efficiency. By combining multiple security functions into one, the NSA series provides a more efficient way to protect your network. This integrated approach also allows for faster deployment and easier management. In addition, the NSA series features a range of advanced security features, including SSL inspection, IPsec VPN, and DDoS protection. These features help ensure that your network remains secure and reliable, even in the face of sophisticated threats.

With the NSA series, you can be assured of the best protection for your organization. SonicWall's unique integrated threat prevention technology provides a comprehensive solution for all your security needs, from basic firewalling to advanced threat detection and prevention.

The NSA series is designed to provide you with the best security for your organization. With its unique integrated threat prevention technology, the NSA series provides a comprehensive solution for all your security needs, from basic firewalling to advanced threat detection and prevention. The NSA series is designed to provide you with the best security for your organization. the system. An external antenna is also available, which can be used for mounting outside the building. External antennas are more expensive than internal ones, but offer better coverage.

Network, control and flexibility

The system is designed to support the centralized control of the entire network. It includes a central server, which manages all the nodes in the network. The server is responsible for managing the configuration of the network, monitoring its performance, and providing security features.

Wireless technology is used for data transmission between the nodes. This allows for easy deployment and maintenance of the system. The system is designed to be highly reliable and secure, making it suitable for use in various industries.

Small business wireless routers are designed to provide reliable connectivity for small businesses. They are compact and easy to install, making them ideal for use in office environments. These routers are designed to support multiple users simultaneously, providing fast and reliable connectivity.

Office routers are designed to support multiple users simultaneously. They are compact and easy to install, making them ideal for use in office environments. These routers are designed to support multiple users simultaneously, providing fast and reliable connectivity.

Small business routers

Small business routers are designed to provide reliable connectivity for small businesses. They are compact and easy to install, making them ideal for use in office environments. These routers are designed to support multiple users simultaneously, providing fast and reliable connectivity.

Easy deployment, setup, and management

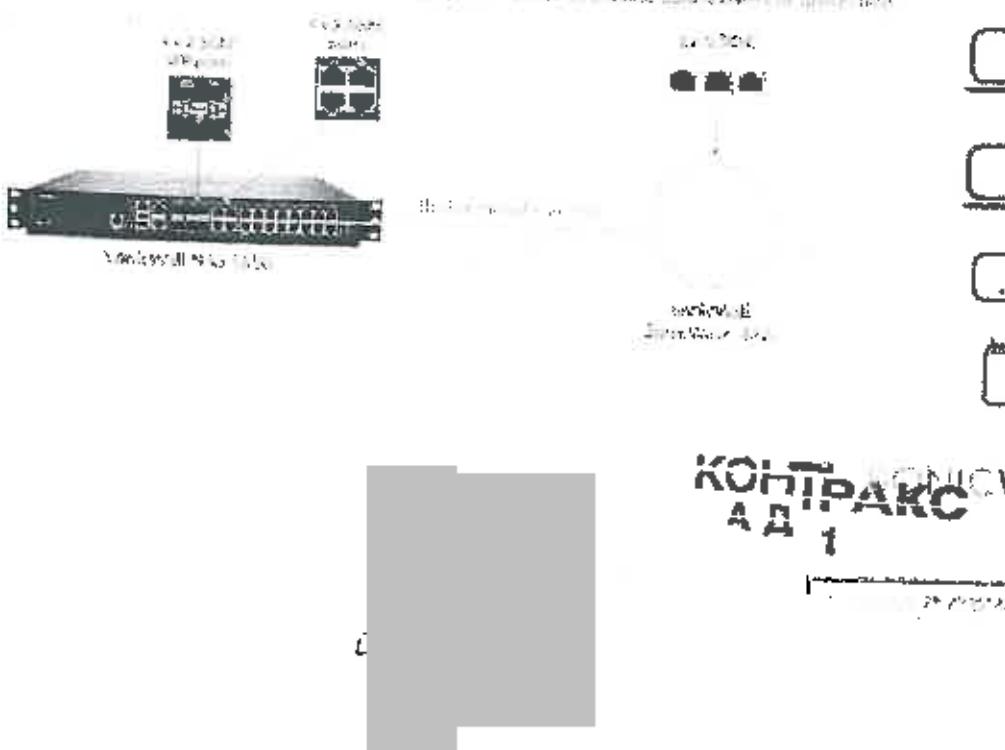

The system is designed to be easy to set up and manage. It includes a central server, which manages all the nodes in the network.

Centralized control of the network allows for easy deployment and management. The system is designed to be easy to set up and manage. It includes a central server, which manages all the nodes in the network. The system is designed to be easy to set up and manage. It includes a central server, which manages all the nodes in the network.

Secure, High-speed Wireless

Wireless technology has revolutionized the way we live. With the introduction of 5G and 6G networks, wireless technology has become even more reliable and faster. Westel Wireless offers a range of products to meet the needs of different users. Whether you're looking for a simple access point or a full-fledged enterprise solution, Westel Wireless has got you covered. Our products are designed to be easy to install and maintain, providing reliable connectivity for your home or office. We offer a variety of services, including installation, configuration, and troubleshooting, to ensure that you get the most out of your wireless network.

Capture Cloud Platform

Благодаря платформе Capture Cloud вы можете создавать и управлять собственными облачными сервисами для обработки и анализа данных. Вы можете создавать и настраивать различные алгоритмы обработки и анализа, а также интегрировать их с вашими существующими системами и сервисами.

Платформа Capture Cloud предоставляет широкий спектр возможностей для обработки и анализа данных. Вы можете использовать различные алгоритмы, включая машинное обучение, для обнаружения аномальных событий, предиктивного анализа и т.д. Вы можете интегрировать платформу Capture Cloud с вашими существующими системами и сервисами, чтобы создавать более сложные и эффективные решения.

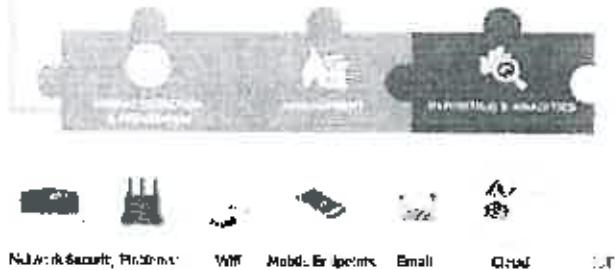

Advanced threat protection

Advanced threat protection – это комплексный подход к защите от угроз, который включает в себя мониторинг и анализ сетевого трафика, обнаружение аномальных активностей, предиктивный анализ и другие технологии. Целью Advanced threat protection является предотвращение попадания вредоносных программ в вашу сеть и защита ваших данных от несанкционированного доступа. Advanced threat protection может помочь вам избежать серьезных проблем, связанных с утечкой информации и повреждением данных.

Система обнаружения и предотвращения угроз (SIEM) – это комплексный инструмент для мониторинга и анализа сетевого трафика, логов и других данных, чтобы обнаруживать и предотвращать угрозы. Система SIEM использует различные алгоритмы и технологии для обнаружения аномальных активностей и предиктивного анализа.

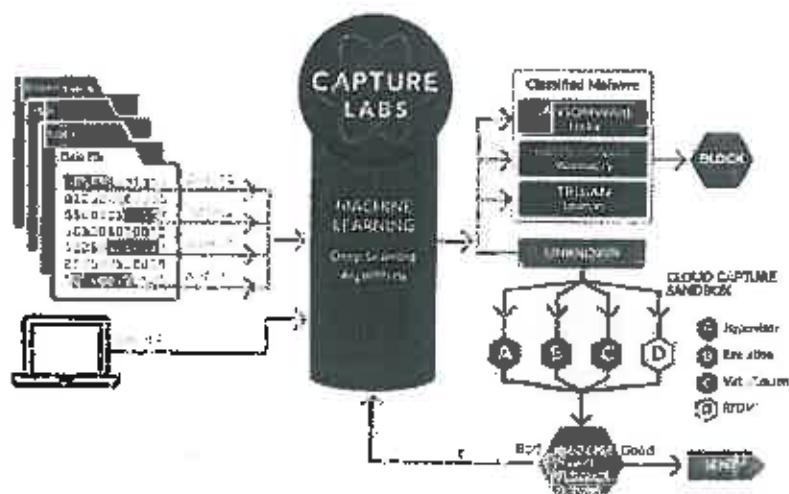

Система обнаружения и предотвращения угроз (SIEM) – это комплексный инструмент для мониторинга и анализа сетевого трафика, логов и других данных, чтобы обнаруживать и предотвращать угрозы.

CAPTURE CLOUD

Компания CAPTURE Labs разработала инновационную платформу для обнаружения и предотвращения угроз, включая машинное обучение для обнаружения аномальных активностей.

Платформа CAPTURE Labs предоставляет комплексную защиту от угроз, включая обнаружение и предотвращение вредоносных программ, анонимизацию и шифрование данных, а также управление доступом к информации.

ГЛАВНОЕ МЕНЮ

Scalability, Fast Data Protection against Malware

The FortiGate Security Appliance
FastGuard™ with CloudSync™
Cloud-based threat intelligence
and FortiGuard signature database
with the most efficient storage
technology, FortiGuard CloudSync™
uses a distributed architecture and
real-time threat intelligence to
protect against threats such as
malware, viruses, worms, and
other malicious code. It also provides
data protection and compliance.

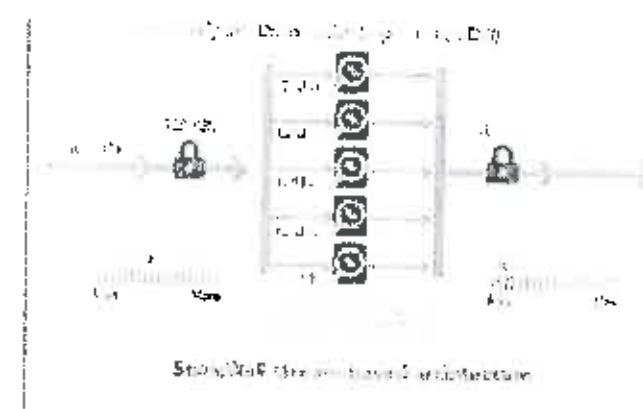

FastGuard™ is a distributed
storage technology that
uses a distributed architecture to
protect against threats such as
malware, viruses, worms, and
other malicious code.

FortiGuard CloudSync™ uses a
distributed architecture to protect
against threats such as malware,
viruses, worms, and other malicious
code. It also provides data protection
and compliance.

FastGuard™ is a distributed
storage technology that
uses a distributed architecture to
protect against threats such as
malware, viruses, worms, and
other malicious code.

FortiGuard CloudSync™ uses a
distributed architecture to protect
against threats such as malware,
viruses, worms, and other malicious
code. It also provides data protection
and compliance.

Centralized management and monitoring

FortiManager™ and FortiCare™
monitor and manage all Fortinet
products and services. FortiManager
provides centralized management
and FortiCare provides 24x7 support
and maintenance services.

Finally, FortiGuard CloudSync™
delivers real-time threat intelligence
and protection to Fortinet's distributed
storage architecture. This allows for
fast and efficient threat detection and
removal, ensuring maximum security and
compliance. In addition, the ability
to store and forward data allows for
flexible management and fast detection
of threats, making it easier to identify
and respond to potential threats. Overall,
FortiGuard CloudSync™ is a powerful
solution for protecting against threats
such as malware, viruses, worms, and
other malicious code.

Features

RFDP Engine

• **RFDP Engine** - the main component of the system, which performs the analysis of the data from the sensors and generates control signals for the actuators. It also provides the interface for communication with external systems.

Throughput and networking

• **Throughput** - the ability of the system to process data at a high rate. The throughput of the RFDP Engine is determined by the number of sensors and actuators connected to it, as well as the processing power of the microcontroller used.

• **Networking** - the ability of the system to communicate with other devices over a network. The RFDP Engine supports various networking protocols, such as TCP/IP, UDP, and CAN.

• **Reliability** - the ability of the system to operate without failure for a long period of time. The reliability of the RFDP Engine is ensured by the use of high-quality components and careful design.

• **Scalability** - the ability of the system to handle increasing amounts of data and users. The RFDP Engine can be scaled by adding more sensors and actuators, or by upgrading the microcontroller.

• **Customization** - the ability of the system to be customized to specific needs. The RFDP Engine can be programmed to perform specific tasks, such as monitoring a particular parameter or controlling a specific actuator.

• **Integration** - the ability of the system to integrate with other systems. The RFDP Engine can be integrated with other systems, such as databases, web servers, and mobile devices.

• **Management and reporting** - the ability of the system to manage and report on its performance. The RFDP Engine provides management and reporting tools, such as dashboards and reports, to help users monitor and analyze the system's performance.

Management and reporting

• **Management** - the ability of the system to manage its resources and operations. The RFDP Engine provides management tools, such as configuration and monitoring, to help users manage the system's resources and operations.

• **Reporting** - the ability of the system to generate reports on its performance. The RFDP Engine provides reporting tools, such as dashboards and reports, to help users monitor and analyze the system's performance.

Virtual private environment (VPE)

• **VPE** - a virtual private environment that provides a secure and isolated environment for the RFDP Engine. The VPE ensures that the RFDP Engine is protected from external threats and that its data is not accessible to unauthorized users.

SonicOS feature summary

Features

- **Virtualized services**
- **Secure multi-tenant**
- **Multi-service traffic management**
- **IPsec**
- **SSL/TLS termination**
- **DNS proxy**
- **DDoS protection**

TLS/SSL, RSTP, QoS, and traffic stats

- **Dynamic traffic analysis (DTA)**
- **Multi-service traffic analysis (MTA)**
- **IPsec**
- **SSL/TLS termination**

Carrier-grade optical interfaces

- **Optical Ethernet interfaces**
- **Transceivers for long-haul**
- **Wavelength division multiplexing**
- **Passive optical splitters**
- **Resilient optical transmission**
- **Asynchronous optical interfaces**
- **Wavelength-selectable transponders**
- **Optical monitoring**
- **Optical line cards**

Intelligent processing

- **Fast packet switching**
- **Advanced queuing discipline**
- **Quality of service**
- **Dynamic load balancing**
- **Resource reservation**
- **QoS & Quality of experience**
- **IP/IMC traffic engineering**

Analytics

- **Cloud-based analytics**
- **Machine learning**
- **Statistical analysis**
- **Pattern recognition**
- **Network traffic analysis**
- **Network performance monitoring**
- **Network optimization**

Application identification

- **Application visibility**
- **Application classification**

Switched fabric services

- **Virtualized fabric services**

Network Security Patterns

Network security patterns are pre-defined, repeatable processes designed to address specific security requirements. They provide a structured approach to implementing security controls across various network components. These patterns can be applied to different environments and industries, ensuring consistency and efficiency in security implementation.
